EXECUTIVE SUMMARY

The Place is a **best in class, mixed use student housing project** on the University of Utah Campus. It will lead the charge in sustainability, innovation, and affordability. The project is ideally located in the heart of campus. The Place connects students, faculty, staff, and visitors to a dynamic environment filled with benefits. This central hub provides eateries, a café, a gym, ample lounge space and other amenities for socializing. The Place is more than a typical dormitory, it's a social, living experience that will enhance the education of the students for many years to come.

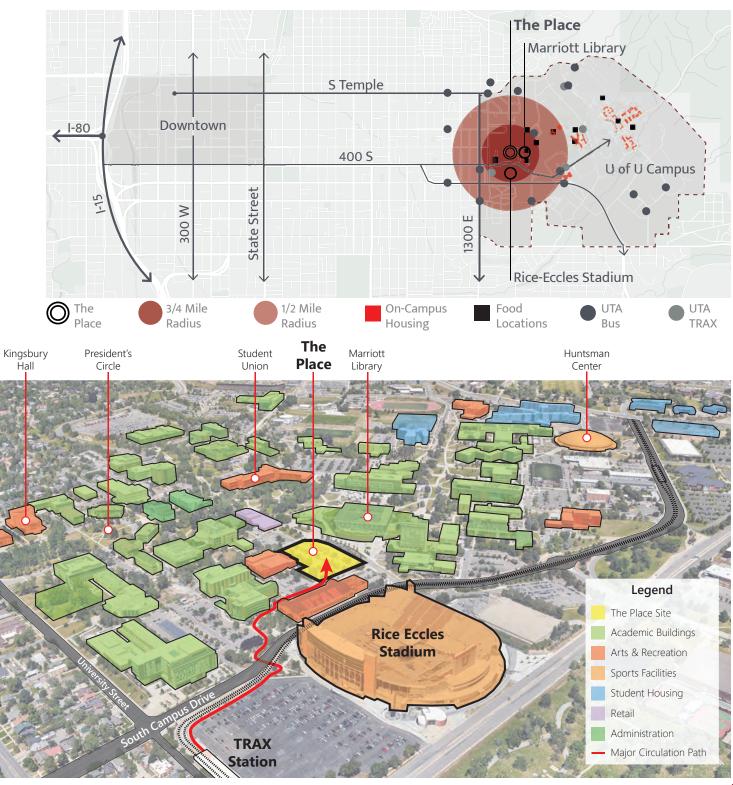

LOC set out to create an **impactful & economically feasible** project in today's increasingly difficult economic environment. We explored various asset classes as well as locations. We determined that on-campus student housing would not only **fill a need**, but provide a **meaningful return** to investors, the University of Utah, and its students.

CONTEXT

The Place is strategically located in the heart of campus to provide convenient access for students to the Marriott Library, Rice Eccles Stadium, TRAX, Academic Buildings, President's Circle, & other existing amenities. This location is highly connected to multiple transportation modes to increase accessibility to the greater Wasatch Front.

- 3 TRAX stops from Downtown SLC
- 5 Golf courses within 3 miles
- 6 Ski resorts within 30 miles
- Trail heads for hiking and mountain biking within 3 miles

HIGHEST & BEST USE

Physically Possible

The building height, massing & structure strategically targets Type IV-C construction from the International Building Code. It is highly economical & ensures that all mass timber can remain exposed. USGS Maps indicate the water table is greater than 100 ft below the surface. Geotech also indicates the soil can support The Place.

Legally Permissible

The university is exempt from city zoning via Utah State Code 10-9a-304 & has the authority to build student housing. Final leadership approval is required from the Utah Board of Higher Education.

Financially Feasible

Financial analysis, shown on subsequent pages, indicates the Place is feasible given current market conditions. It also maximizes shared value creation for its investors. the University Foundation, the Scholarship Fund, and its students.

Maximally Productive

The U of U is far behind other PAC-12 schools with their housing options & on campus amenities. To remain competitive, under-utilized sites such as this need to be transformed into student communities. The University is currently exploring plans to expand oncampus housing.

The site, also known as Lot 6, is currently utilized for parking. It's not fulfilling its greatest potential. The Place will replace this lot and will infuse the heart of campus with over 550 beds. It will also provide substantive retail & amenity space at the intersection of existing circulation paths that are some of the most trafficked on campus.

The Place will become a magnet for activity. On football game days, the project will host activities & a procession for students to march directly to the stadium to cheer on The Utes as the MUSS!

DEMAND

Supply & Demand

Demand for housing is extremely high at the University of Utah. During the Fall of 2022 there were 3,000 students on a waiting list for on-campus housing. The University of Utah needs 5,000 new beds built within the next five years to keep pace with demand. The Place will assist in filling this need with a best-in-class product, giving students an on-campus housing option that is more than just a dormitory.

"Students who live on campus graduate more quickly, get more engaged (and) are more successful."

- Andrea Thomas, Chief Experience Officer, University of Utah

Feasibility through Partnership

To fulfill their housing needs, the University prefers to utilize a Public Private Partnership with a developer. The university requires an inhouse approval process that includes a feasibility study, a design study & final leadership approval from the Board of Utah Higher Education.

Asset Class

As Universities compete with online education, they need to set themselves apart through placemaking and creating an environment where students will thrive. During economic downturns, schools often thrive due to an increase in people seeking skill and educational development.

Recession Resistant Current Supply & Demand

| Enrollment | 34,464 |
|--|------------------|
| Current Housing | 5,837 |
| U's Fall 2022 Waitlist | 3,000 |

*Data from Yardi

VISION | INNOVATION

Partnership Structure

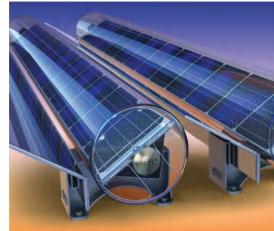

The Place is a **joint venture** between LOC & the University of Utah through a Public Private Partnership. This innovative approach to student housing will combine resources to create synergies that wouldn't exist otherwise. The whole is truly greater than the sum of its parts with this strategy.

Building Certifications

The U of U requires all new buildings to achieve, at minimum, a LEED Silver rating. The Place will go one step further by achieving **LEED Gold**. The project will also achieve **Passive House Certification**. These innovative approaches create energy-efficient buildings by utilizing superior technology & the latest advancements in building science.

Photo-Voltaic Tubes

Advancements in PVs have led to Solar Thermal Tubes which capture **both electricity and thermal energy**; doubling their effectiveness compared to typical PVs. They can also be installed in both vertical & horizontal planes.

Prefab Construction

The Core building components will utilize offsite prefabrication which **reduces on site assembly & waste**. It also ensures **greater precision & longevity**. Quality is significantly improved using this method of construction.

PUBLIC PRIVATE PARTNERSHIP STRUCTURE

A Conversation with John Creer, Chief Real Estate Office, University of Utah

U of U Student Housing Goals

- Facilitate the development of **5,000 new beds** on-campus & **5,000** new beds off-campus.
- Transfer risk: Utilize external funds to increase the University's housing inventory. The U does not want to add debt to its balance sheet.
- Maximize shared value to the University by way of placemaking & moneymaking.
- Fund the University of Utah Growth Foundation—a non-profit private foundation for advancing the purposes of the University.

Partnership Structure

| Total | 100.0% |
|-----------------------|--------|
| Scholarship Fund | 2.5% |
| University Foundation | 30.0% |
| LOC | 67.5% |

"I'd do it. [The Place] sounds like a great project. However, the University does not want to do a one-off, it would need to be programmatic."

- John Creer, Chief Real Estate Officer, University of Utah

Important Considerations

- The University does not want a major discrepancy in housing stock. The Place should complement the rest of the oncampus housing & be in line with other rents. The Place is in line on a nominal basis with other rents on campus & in many cases is cheaper on a \$/SF basis. Some of the amenities like the gym & retail will be available for all students to use.
- The U wants a presence or space within our project to control how students engage with the property. The Place will provide 2,000 SF of retail space for the University to use for its needs—perhaps for tutoring, counseling, or remote classrooms.
- There are University emissions & carbon standards that The Place will be required to meet. The Place will meet or exceed all University requirements.
- The University of Utah is already building parking structures and replacing the parking is sufficient & melds into the overall parking stock.
- According to the University, LOC should demonstrate a "normal and customary return". A 6.3% YOC & 19% IRR are reasonable. Not excessive, but worth doing.

Appropriate Structure

- The University of Utah will lease the land for The Place to a partnership with the University of Utah Growth Foundation & LOC for \$1/year for 99-years.
- The Foundation will receive 30% (the equivalent of the market value of the land) in the partnership. After all debt service and LOCs initial investment of \$30.2MM is paid back, all cash flow will be split at the pro-rata share. This allows the University to participate in the upside & control while equity is paid back in a reasonable timeframe & compensated for its risk.
- The partnership carves out 2.5% of all operating & financing revenue for a Scholarship Fund anticipated to give \$1MM in scholarships over the first 10-years of project operations in order to improve affordability.
- The University of Utah will have a right of first refusal should LOC ever seek to sell its interest in the partnership and property.
- The housing stock will be entered into the University rental portal allowing the University to control the student experience.
- The Place will be the first of 6-8 on-campus student housing projects that LOC & the University will joint venture to fulfill the need for 5.000 additional beds.

VISION | DIVERSITY, EQUITY, & INCLUSION

Studies have shown that one of the most effective ways to pull people out of poverty is through integrating the rising generation from all socio-economic backgrounds. A barrier to integrating students is affordability. Thus, to keep The Place affordable to all students, 2.5% of the cash flow will be contributed to a Needs-Based Housing Scholarship Fund.

Current & future students housed at The Place are invited to apply for assistance from the scholarship fund to be applied to their living expenses. It is anticipated that approximately \$1,000,000 in scholarships will be awarded within the first 10 years of The Place being occupied.

LOC will conduct extensive community outreach to ensure the most disadvantaged are aware of the great opportunities that come from living on campus. The Place will be designed and constructed to be barrier free & will strictly follow all ADA requirements. Efforts will be made to create a diverse, equitable & inclusive living environment for all students.

Carbon Footprint

On Campus Student Housing sustainable inherently greatly decreasing commuting miles walkability. promoting project's Reducing the carbon footprint is a core consideration. Thus, the mass timber structure was specifically chosen for its ability to **sequester carbon**.

Health & Wellness

Careful attention will be given to improve health & wellness by implementing principles of **biophilia** (the instinct to connect with nature). Connection to nature is proven to improve mental health & cognitive abilities as well as reduce absenteeism. The Place will reduce stress and anxiety.

Timeless Beauty

Arguably the most important factor for sustainability. We need future generations to value our designs in order to ensure they remain standing decades from now. Beautiful buildings don't often get torn down. The Place is imbued with a sense of beauty and will stand the test of time.

Net Zero Energy

All required energy will be provided by on site renewable energy generation & through Rocky Mountain Power's Blue-Sky Program. As well, all appliances & MEP will be 100% electric. Electrical Vehicle Charging Stations will also be provided.

Water Conservation

Drought conditions have made this a paramount consideration. The Place will utilize low flow fixtures and appliances. It will harvest Grey Water for landscaping & toilet needs. Drought tolerant & native plantings will also be used.

GREEN LOANS

Lenders are competing more for sustainable development projects as they strive to meet their goals. Consequently, Green Loans are attainable for The Place based on industry expert feedback. The benefits from a lender's perspective are:

Financial: Lower credit risk, higher cash flows, & higher property value **Social:** Greater affordability, higher quality, healthier, & more durable housing **Environmental:** Improved energy use, water resources, & greater resiliency

Wells Fargo Construction Loan

The Place meets all program requirements:

- LEED Gold Certification (or higher)
- Electric HVAC Systems
- 50% of building utilization powered by re-newables (on or off-site)
- Proof of Product Specific Environmental Product Declaration (EPD) for window/glazing systems, concrete, steel, & roofing

Program benefits

• 15 bps spread reduction

Benefits to The Place

- Reduces overall construction pricing from SOFR + 300 to SOFR + 285
- Spread reduction saves ~\$200k in construction interest carry

Fannie Mae Permanent Loan

The Place meets all program requirements:

- Possess a nationally recognized, current Green Building Certification
- Property improvements that target reductions in energy &/or water use
- Energy Star appliances

Program benefits

- Preferential pricing provides a ~20-30 bps spread reduction
- Additional loan proceeds

Benefits to The Place

- Reduces overall permanent loan pricing from 10-yr Treasury + 170 conservatively to 10-yr Treasury + 150
- Spread reduction saves interest expense of ~\$1.7MM over the course of 10 years

INFLATION REDUCTION ACT

Under the Inflation Reduction Act (IRA), there are three energy related tax incentives that The Place can utilize. These tax incentives can be combined. They include the tax deduction known as 179D, the tax credit known as 45L, and the Investment Tax Credit for Eligible Clean Energy.

179d Tax Deduction – Commercial Building Efficiency

Receive up to \$5.00 per square foot for energyefficient improvements made to lighting, HVAC, and building envelop systems that exceed industry standards.

45L Tax Credits – Large Residential Efficiency

Tax incentive related to commercial real estate that provides a tax credit of up to \$5,000 per dwelling unit to developers and builders of energy - efficient residential buildings that exceed energy code requirements.

Investment Tax Credit for Eligible Clean Energy

ITC of 30% of total project cost for eligible clean energy technologies like solar, dynamic glass, and battery storage. For informational purposes only—there are additional "bonus" opportunities that could increase the incentive up to 60%.

179D Tax Deduction Amount

| Per Annual Energy Cost Reduction Compared to Baseline | | | | | | | | | |
|---|-----------|-----------|-------------|-------------|--|--|--|--|--|
| Energy Reduction | 25.0% | 30.0% | 40.0% | 50.0% | | | | | |
| 250,000 SF | | | | | | | | | |
| No Prevailing Wage | \$0.50/SF | \$0.60/SF | \$0.80/SF | \$1.00/SF | | | | | |
| Tax Deduction | \$125,000 | \$150,000 | \$200,000 | \$250,000 | | | | | |
| Prevailing Wage | \$2.50/SF | \$3.00/SF | \$4.00/SF | \$5.00/SF | | | | | |
| Tax Deduction | \$625,000 | \$750,000 | \$1,000,000 | \$1,250,000 | | | | | |

| Cost/Panel | \$1,000 | | | | | |
| Total Cost | \$746,000 | | | | | |
| Total Tax Credit (30%) | \$223,800 | | | | | |

SUSTAINABLE DESIGN

Moving 588 college students to on-campus housing from an average distance of 4 miles away could reduce their annual carbon footprint by 310.5 metric tons of CO2 emissions.

This is equivalent to burning 352,972 pounds of coal, driving 745,469 miles, or the energy use of 35 homes for one year.

Energy Absorption

Solar/thermal tubes, a new innovation that captures both electricity & thermal energy from the sun. Doubles the amount of energy captured compared to typical PVs.

Summer Sun

Sunshading

Louvered/perforated shade devices protect glass on South/ West facades from harsh solar gain during warmer months, reducing energy required for cooling loads.

Winter Sun

Thermal Mass

A thermal battery that extracts excess heat from the air to passively cool the space in the summer. Also absorbs solar gain during winter months to provide passive heating.

from the Sustainable Forestry Initiative (ensures extracted trees are

replaced). Wood also has the added benefit of sequestering carbon,

which is crucial in our fight against climate change.

Optimal Mech Systems

Efficient heating/cooling systems include VRF (Variant Refrigerant Flow) tech which is tied into the thermal tubes & a ground source heat pump. In addition, an energy recovery ventilator provides fresh air with negligible energy loss.

Envelope Performance

R40 Walls & R60 Roof Insulation combined with ultra air/water/vapor tightness as required for Passive House Certification.

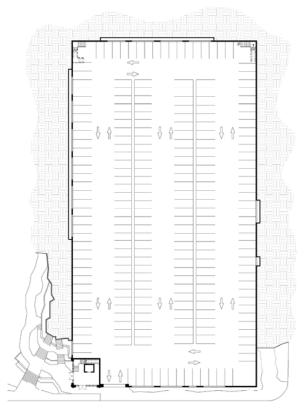

Passive Cooling

"Night flush cooling" is a passive strategy that uses cross ventilation at night to pull heat that was absorbed from thermal mass during the day & transfer it outside.

Floor Plan Efficiency

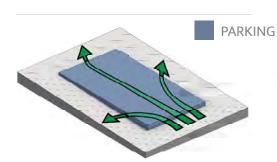

Three levels of living space are accessed from one corridor. Using this skip/stop circulation reduces necessary square footage & materials by 12% compared to typical circulation methods.

Shared living room and kitchen

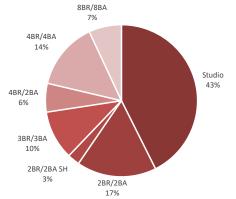

4 BEDROOM //

Private Rooms & Bathrooms
Shared Kitchen & Living Room

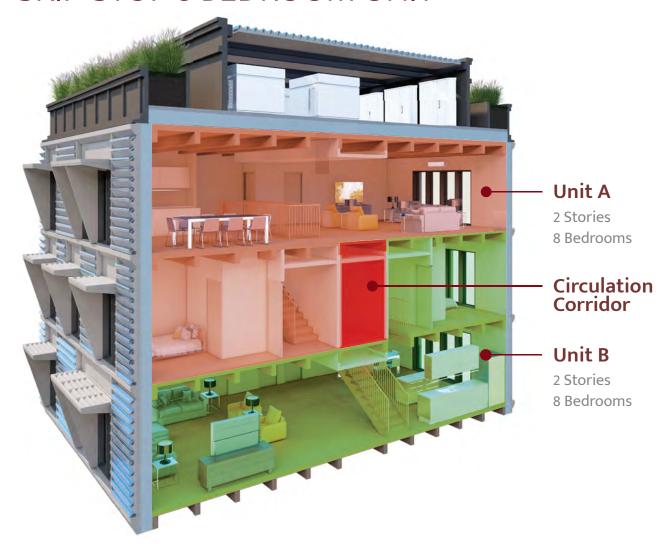

BEDROOM MIX

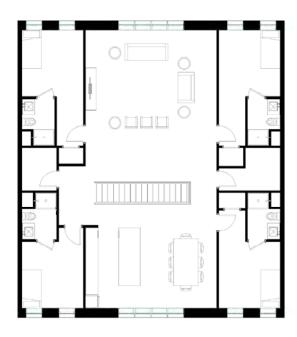

SKIP-STOP 8 BEDROOM UNIT

Skip-Stop Circulation Cross Section

This organizational strategy allows three levels of living space to be accessed from **one central circulation corridor**. This is made possible by adding interior stairs within the units to access upper and lower levels. This creates a dynamic living environment by providing views and

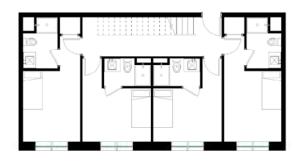

daylight from two faces of the building. The open floor plan will be ideal for social interaction and collaboration. In addition, **Skip-Stop Circulation requires 12% less corridor space than a typical layout.** The units target athletic, academic, or social groups who want to live together and foster unity.

Views from 2 sides of the building

8 BEDROOM UNIT A Entry Level

RESIDENT AMENITIES

BIKE//SKI STORAGE

Provides secure and convenient space for bike and ski gear storage. Encourages eco-friendly transportation options and outdoor recreation activities.

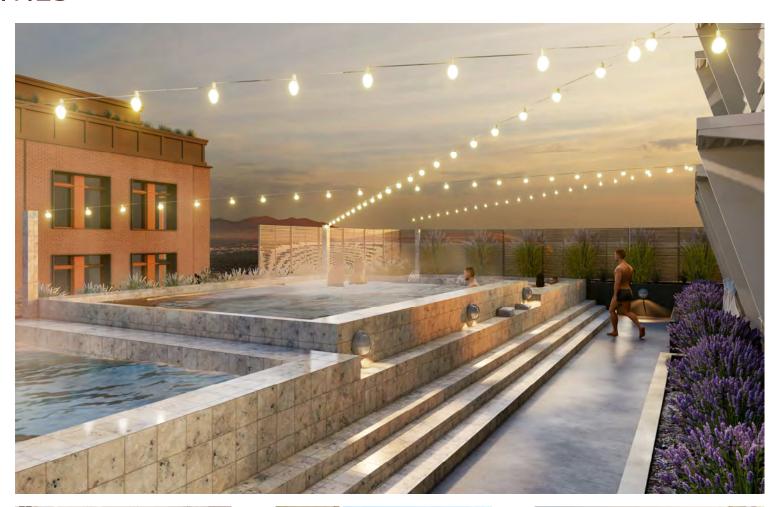

CONFERENCE//STUDY

Collaborative space for students and staff to hold meetings, group projects, and study sessions in a professional setting.

CLUBHOUSE

Serves as a social and recreational hub for organized events, casual gatherings, and student community-building activities.

LAUNDRY

Each unit will be provided with its own dedicated laundry. Research has shown this is one of the most desirable amenities.

AMENITY DECK

Panoramic views, fresh air, and various amenities, such as seating areas, gardens, grills, and entertainment options.

SPA

This rooftop spa provides a relaxing and rejuvenating outdoor experience, promoting student wellness and selfcare.

RETAIL & U of U AMENITIES

MAKER SPACE

Collaborative workspace where students can share resources, tools & knowledge to create & learn.

UNIVERSITY SPACE

The Place provides classrooms, tutoring & counseling services for greater learning opportunities.

GYM

An area to alleviate stress & to provide an outlet for socializing with friends and colleagues.

ICE CREAM PARLOR

An area to escape the stresses of academic life & to provide an ideal outlet for socializing with friends & colleagues.

RESTAURANT & CAFE

Campus lacks restaurants and cafes. The Place will provide delicious food in a sophisticated & relaxing atmosphere for occasions ranging from quick stops to special events.

MARKET//FOOD KITCHEN

Convenient access to fresh food & groceries for everyone on campus. Enhances campus life & promotes healthy eating.

Development

9 Months

Activities include Due Diligence, Legal & Contracts, Capital Sourcing, U Coordination, etc.

Design

11 Months

Building Design, Prep Construction Documents, Detailed Budgets, Value Engineering, Etc.

Bidding

2 Months

Best pricing will be achieved through a competitive bidding process

Construction

26 Months

Multiple GC's have indicated a 26 Month Construction Schedule is Ideal. Pre-Fab further optimizes the schedule

Occupancy

3 Months

Punch List Items, Receive Certificate of Occupancy, Owner FFE Installs, Student Move-Ins The Place has been planned with an extended timeline to allow **ample flexibility** in the schedule. This will ensure The Place is delivered and occupied by the Fall 2027 Semester.

^{*}Based on hypothetical 10 year exit

The Place pencils without any special financing considerations. However, the tax credits from the Inflation Reduction Act and spread reductions from Green Loans bolster The Place's returns.
