SCHOLARSHIP OVERVIEW

Applicants with a complete MSCM application are eligible to apply for admissions scholarships. A separate scholarship application will be emailed to eligible applicants after notification of their admissions decision. Criteria for awards include demonstrated excellence in academic or professional pursuits, as assessed in program and scholarship applications.

- **Employer Benefit Reimbursement Match**

For students who work for a company offering tuition reimbursement, the Eccles School will match the benefit up to \$5,000.

- **U of U Alumni Scholarship**

University of Utah alumni are eligible for a tuition scholarship once admitted to the Eccles School Cybersecurity Management program. Applicants can qualify for this award by including the University of Utah as their degree-granting institution as well as uploading unofficial transcripts on their program application.

MSCM

MASTER OF SCIENCE IN CYBERSECURITY MANAGEMENT

The **Master of Science in Cybersecurity Management** is a highly specialized degree designed to ready the next generation of cybersecurity specialists. In high demand, experts in cybersecurity mitigate risks to critical U.S. infrastructure and key industries such as healthcare, government and manufacturing. Protecting data, designing secure tech and managing resources requires technical know-how, as well as management skills. Our Cybersecurity Management program offers training in both.

The Cybersecurity Management program offers maximum flexibility, including evening and online courses, full-time and part-time options, nine credits of electives, and the ability to work while attending school. Students craft their degree to match their interests, career goals, and lifestyle. The program can be completed in as little as a year, even while working full-time.

MSCM CYBERSECURITY MANAGEMENT

PROGRAM HIGHLIGHTS

Business Career Services

Eccles School students receive personalized career counseling and placement assistance. Students attend recruiting events, tap into an exclusive job database, and receive valuable guidance on job search, resumes, and interviewing techniques.

Networking

By the time they finish the program, students have a diverse peer group and a robust professional network—great for support, career building, and innovation.

Flexible Schedule and Format Options

The Cybersecurity Management program is offered in both full-time and part-time formats and is taught on-campus and as a 100% online program.

High-Value Knowledge and Leadership Training

One out of every three cybersecurity management jobs in the U.S. is currently vacant.* Due to the specific expertise necessary—both in technology and management—and the lack of qualified candidates, opportunities abound in this critical industry.

*Official Microsoft Blog, Blogs.Microsoft.com, October 2021, Brad Smith, President and Vice Chair.

AREAS OF SPECIALIZATION

Technical

Develop technical skills in a broad range of topics to help understand the assets under protection.

Data

Learn how to leverage data analytics to detect and prevent highly sophisticated attacks.

Leadership

Gain knowledge and experience to lead security programs and interact with executives.

EMPLOYMENT SUCCESS*

MEDIAN ANNUAL SALARY

\$102,6000

*U.S. Bureau of Labor Statistics

JOB OUTLOOK

33%

Projected to grow 33% by 2030
– much faster than average.

CAREER SERVICES

Cybersecurity Management students benefit from working one-on-one with a dedicated career coach throughout the program. These coaches help students prepare to enter the growing market for technology professionals and teaches a one-credit-hour course on career development.

With several Fortune 500 technology companies located in and near Salt Lake City, Cybersecurity Management graduates land jobs at some of the most prestigious organizations in the United States.

INCREASE YOUR SKILLS

Capstone

Cybersecurity Management students complete a capstone project as the culmination of their degree. This project is an opportunity for students to put their classroom knowledge to work by preparing for and achieving an approved cybersecurity or IT certification to demonstrate skills that complement their education. Completed over two to three semesters, the capstone is worth three credit hours.

Concurrent Degrees

Students have the option to earn a Full-Time MBA, Professional MBA, or MBA Online concurrently with the Cybersecurity Management Master's degree. Learn more at [Eccles.link/MSCM-Admissions](https://eccles.utah.edu/link/MSCM-Admissions).
